TESTIMONIALS.

ADOPTION OF THE

AMERICAN SEMAPHORIC SIGNALS

BY THE GOVERNMENT.

United States Revenue Marine.

CIRCULAR TO THE REVENUE OFFICERS.

"*Treasury Department, June* 12, 1846.

"This Department having adopted Rogers & Black's Semaphoric Dictionary for the use of the Revenue Marine, a full set of flags, with a copy of the Dictionary, will be forwarded to each vessel, put up in a convenient chest.

"A simple, and at the same time comprehensive mode of communicating intelligence *between the vessels of the Revenue Marine*, or *between them and other vessels at sea*, as well as with the shore, *is a subject of great importance;* and as the use of this mode of communication is being introduced at the Semaphoric Stations upon the seaboard, you are *desired to embrace every opportunity* after their reception, *to familiarize the officers with their use*, by *making frequent communications when in sight of other vessels so provided*, dispensing with the use of boats to communicate or receive intelligence whenever circumstances will permit.

"R. J. WALKER, Sec. of the Treasury."

CIRCULAR TO COLLECTORS OF THE CUSTOMS.

Treasury Department, April 1*st*, 1846.

SIR:—Application having been made by Messrs. Rogers & Black, patentees of the American Semaphore system of Marine signals, for the names of the vessels belonging to the United States, for the purpose of numbering and inserting them in a second edition of their Telegraph Dictionary, now in preparation; and the Department conceiving that the proposed addition to their Dictionary might tend beneficially to the commercial interests of the country—you are requested to transmit to this Department as speedily as the current business of your office will permit, a list of the names (with the *class, i. e.* whether ship, *steamer*, bark, brig, schooner, &c.,) of the permanently registered and enrolled vessels, above 20 tons, belonging to your District, specifying the tonnage of each vessel.

Respectfully, your obedient servant,

R. J. WALKER, Secretary of the Treasury.

"Revenue Bureau, *Treasury Department, Dec.* 17, 1845.

"*Gentlemen*—Having carefully examined your Semaphoric Dictionary and Flags, and having made use of the various modes of communicating by Flags at sea, I do not hesitate to pronounce it *the most comprehensive and perspicuous plan I have seen.*

"The arrangement of the Dictionary appears to *embrace all subjects* desirable to communicate under any contingency; while at the same time it is simple, and may be readily comprehended. The colors of the Flags are such as may be *distinguished at the greatest possible distance*, and their significations are easily changed.

"Their GENERAL ADOPTION, throughout the Government and commercial marine, and at the principal Semaphoric Stations on the seaboard, would doubtless result GREATLY TO THE ADVANTAGE OF ALL INTERESTED IN NAVIGATION.

"Very respectfully, your ob't serv't,

ALEX. V. FRASER, Capt. U. S. Rev. Marine.

"Messrs. Rogers & Black, Proprietors Marine Telegraph."

Buffalo, *May* 12*th*, 1846.

Gentlemen:—I have delayed acknowledging the receipt of your letter, accompanying the Telegraphic Dictionary and Seaman's Signal Book, for the purpose of seeing some persons to whom I wished to recommend your valuable work, as highly important to the ship owners and merchants, engaged in the commerce of the lakes, as well as in the transmission of secret intelligence by the Magnetic Telegraph. Several of the most extensive and intelligent ship owners in this vicinity, have expressed themselves as being fully satisfied, that great advantages would accrue to the commercial operations of this section of country, by the general adoption of your Telegraphic Signals.

In my opinion, your mode of communication is very concise, and free from ambiguity, and the various and simple combinations of the flags, together with your very comprehensive and well arranged Dictionary, gives it advantages peculiarly adapted to communicating between vessels at sea, and with the Telegraphic stations on shore.

I am much pleased to hear that your Signals are to be used in our service.

I am, gentlemen, very respectfully, your ob't ser'vt, D. OTTINGER,

Lieut. U. S. R. M.

Messrs. Rogers & Black, Proprietors of Marine Telegraph, Washington, D. C.

Opinion of Professor Morse.

New York, *July* 14, 1845.

"*Dear Sir*:—I have examined your Dictionary of Phrases, arranged for the Semaphore Telegraph, and I take great pleasure in recommending it as being as well adapted to facilitate the communication of intelligence by the Magnetic Telegraph, as by Marine Signals; and I congratulate you on having made a most valuable addition to this class of works. I wish you every success, and especially that you may reap a proper reward for your labors.

"Your friend, S. F. B. MORSE,

Superintendent of Electro-Mag. Tel. for U. S."

To Henry J. Rogers, Assistant Superintendent of Electro-Mag. Tel. for U. S.

Opinion of Officers of the U. S. Navy.

U. S. Naval School, Annapolis, Md., *March* 24, 1846.

Dear Sir:—I had the pleasure to receive, in December last, as a present from you, your valuable Telegraph Dictionary and Seaman's Signal Book. Although I have delayed until this moment acknowledging its receipt, I have not neglected examining thoroughly into its merits.

I think it DECIDEDLY the MOST VALUABLE and PRACTICABLE WORK of the kind I have seen. It is well calculated to communicate useful information with great facility and ease.

Such a book, introduced into the Mercantile Marine *generally*, and a copy placed on board our men-of-war, would be very desirable; it would enable us frequently to convey (during heavy weather, or when ships are at too great a distance to use the speaking trumpet,) valuable information to our Merchants and Ship-masters.

With a sincere hope your labours may meet with success, I am, respectfully, your ob't serv't, FRANKLIN BUCHANAN, Commander.

H. J. Rogers, Esq., Baltimore.

Baltimore, 11*th May*, 1846.

Dear Sir:—I have to thank you for a copy of your valuable work, which you have done me the honor to present to me.

Having given it a careful examination, I am satisfied that as a practical and comprehensive system, the "Telegraph Dictionary and Seaman's Signal Book," is the most perfect I have seen, and cannot but commend itself to all engaged in navigation, and in Commercial Marine, and might also be adopted with advantage in the Navy.

I hope your labours will not fail to be rewarded by an extensive and deserving patronage.

I am, very respectfully, your ob't ser'vt, D. GEISENGER.

Henry J. Rogers, Esqr., Baltimore.

Navy Yard, *Washington, Sept.* 30, 1846.

Gentlemen:—Your letter dated Baltimore, July 23d, was duly received, accompanied by a copy of your Telegraphic Dictionary and Signal Book. From the examination I have been enabled to give this work, I am of opinion that it is a valuable code of signals, well calculated to secure the advantages contemplated by its enterprizing and ingenious authors, and that the more generally it is adopted by our Commercial Marine, the more it will be approved and appreciated.

With many thanks for the present of this useful and handsome volume, I am, gentlemen, very respectfully, your ob't serv't,

C. S. McCAULEY, Capt. U. S. Navy.

To Messrs. Rogers & Black, Proprietors American Semaphoric Dictionary and Flags, Baltimore.

Washington, *May* 20*th*, 1846.

Messrs. Rogers & Black:

Gentlemen:—I have examined your Telegraphic Book lately presented to me; and have watched the progress of your beautiful system, towards completion, nearly from the commencement of your project to the present moment, with increasing interest, and conviction of its excellence for every species of telegraphic communications. Were it of general adoption in the mercantile marine, in the navy and on shore, it would afford a simple, quick, and practical means of communication, never yet attained by any Telegraphic appliances with which I am acquainted.

Wishing you every success in your plans for introducing your Telegraph into general use,

I am, gentlemen, very respectfully, your obdedient servant,

L. M. POWEL, Com. U. S. Navy.

The Committee who have been appointed on this subject will probably take an early opportunity of making an exhibition of the operation of the system, which will doubtless attract public attention here to the matter, and by this means the advantages of the system will become general in this community.

I have the honor to be, gentlemen, your most obedient servant,

KER BOYCE.

President Chamber of Commerce, Charleston.

A letter from Mr. Heriot, the Secretary, states that the Special Committee of the Charleston Chamber of Commerce in reference to the extension of the Telegraph System, consists of Messrs. James M. Stocker, G. A. Trenholm, and James Chapman.

Opinion of Baltimore Insurance Companies.

BALTIMORE, *27th February*, 1846.

Having examined Rogers & Black's Telegraph Dictionary and Seaman's Signal Book, we are of opinion that, when fully carried out as contemplated, it will prove of vast utility to the shipping and mercantile interest of the United States.

Such a work as the "Seaman's Signal Book" has been long needed, and the work of Messrs. Rogers & Black cannot fail to be of the greatest advantage to every one interested in navigation. We, therefore, deem it our duty, and take pleasure in recommending it to the seafaring community.

A. I. SCHWARTZE, Pres't American Mut. Ins. Co. of Baltimore.
SAM'L T. THOMPSON, Pres't Atlantic Mut. Ins. Co. of Baltimore.

Marine Insurance Inspector's Office.

BALTIMORE, *March*, 1846.

HENRY J. ROGERS, Esq.

Sir:—Having carefully examined your Semaphore Dictionary and Signal Flags, I freely add mine to the already powerful testimony given, to the *comprehensiveness*, *clearness* and *completeness* of the System of Telegraphing which you have invented.

With others, I have long *deplored the want of such a mode of rapid and certain communication*, without hoping for so speedy a realization of it. To you belongs the honor (and I trust will inure the reward) of providing so extensively for the benefit of the whole mercantile and marine interest, and what is of infinitely more consequence, for preserving the valuable lives annually lost for want of timely notice of their peril.

I consider YOUR INVENTION COMPLETE, and desire to recommend it, wherever my opinion may be of value, in the very strongest terms.

Respectfully, yours, JOS. CLACKNER,
Inspector for the Mar. Ins. Co's.

Baltimore Marine Telegraph Office.

FEDERAL HILL, *March 27th*, 1846.

Messrs. ROGERS & BLACK:

Gentlemen:—I have examined your Book of Signals, and also have established a station at North Point, on the Western Light, for the purpose of practising their use, in connection with my station on Federal Hill, and I find I can correspond very freely with both stations—having in both establishments as good telescopes as can be found at any other stations in the United States. And I have no hesita-

tion in saying that your Book and Signals ought to meet that encouragement they deserve from the Government and the commercial community of the country. I have adopted them, and consider them a great auxiliary to my establishment, for telegraphing vessels between Baltimore and the Chesapeake Bay.

I remain yours, THOS. N. NEILSON.

Opinions of Philadelphia and Delaware Pilots.

PHILADELPHIA, *February* 21, 1846.

Messrs. ROGERS & BLACK:

GENTLEMEN: Having carefully examined your Book of Signals applicable to marine intercourse, we have no hesitation in recommending it for general use, and have no doubt that your system of Telegraphing between this city and the Capes with signals, will meet with that success you richly merit. It is well known that in the absence of such a system much valuable information is delayed for a long time, when the adoption of your code of signals would prove invaluable in transmitting news to the commercial community. * * *

In the winter season, when boarding vessels is attended with danger, and when it is impossible to communicate otherwise with the shipping off the coast, your code of Signals, which is simple and abounding with all that is desirable, removes the difficulty, and in a very short period (with those signals) the news reaches this city.

With such views we wish you may meet with success, and be amply rewarded for your labors.

In behalf of the Pilots,

JOHN FULLER,	JAMES C. SAUNDERS,
WM. SCHELLENGER,	ELISHA RICORDS,
LEVI LINGO,	LEWIS M. LOWE,
WILLIAM F. EDWARDS,	JOHN SAUNDERS,
JAMES R. KELLY,	GEO. D. HOFFNER.

[*From Lyford's Commercial Gazette.*]

THE TELEGRAPH DICTIONARY, *and Seaman's Signal Book*—Is a new system of Semaphoric correspondence by Flags, Flags and Balls, Flags and Pennants, &c.—or Flags, Letters and Numbers, for which Henry J. Rogers, Esq., Assistant Superintendent of Electro Magnetic Telegraphs for the United States, has secured the Copy-right. The work has merit; and its author will undoubtedly live to see the day (for he has not yet reached a middle age,) when it will be generally practised, not only among Shipmasters and Naval Officers as a medium of communication at sea, but in their correspondence also with Telegraphs ashore; and *by acting in concert with the Electro-Magnetic*, the two will thereby become mutually auxiliary, and the useful results of these combinations, we at present can form no idea of.

In conclusion, the system will be taught as one of the branches of, or an appendage to Navigation;—and as soon as its uses are properly comprehended, shipmasters would nearly as willingly go to sea with a short supply of stores as without the necessary Signals and a Telegraph Dictionary to assist them in the event of any contingency.

THIS WORK

IS RESPECTFULLY DEDICATED

BY

THE AUTHORS.

CIRCULAR.

NAVY DEPARTMENT,
Feb. 16*th*, 1847.

IN order to facilitate and improve the mode of communication at sea by Ships of War with each other, and with vessels of the Revenue Marine and Merchant Service, Messrs.

ROGERS & BLACK'S SEMAPHORIC DICTIONARY

has been adopted for the use of the Navy, copies of which, together with the necessary flags will be distributed among the public vessels of the United States, as the department may from time to time direct.

Officers of the Navy will embrace every convenient opportunity to familiarize the service with the use of these signals by communicating with other vessels which may possess them, and with Semaphoric Stations on shore.

J. Y. MASON.

INTRODUCTION.

THE "Marine Roll" contains a List of the Names, Classes and Ports of Entry of all Steamers and Merchant Vessels, of 20 tons measurement and upwards, registered and enrolled in the United States.

The undersigned have been at great expense in the publication of the following work, and should they be favoured with the support of those connected with the Mercantile Marine, it is their intention to publish annually, a supplement, in which will be introduced the Name, &c. of each vessel of 20 tons measurement and upwards, that may be hereafter registered and enrolled.

Where there are two or more vessels of the same name, belonging to the same district, the tonnage of each has been introduced.

This is the first Signal Book ever offered to the Merchants of the United States, containing a full List of the Mercantile Marine; and as it has been adopted by the Government, comment is unnecessary as regards its claim and superiority over all others.

The present unsettled state of our affairs with Mexico, render it probable that Merchant Vessels may require the protection of our Navy and Revenue Marine; it is therefore highly important that they should be provided with the "American Semaphoric Signals," the use of which will be required, when sailing under convoy of Government, or in company of other vessels.

Suggestions for the improvement of the work, will be thankfully received and properly noticed.

ROGERS & BLACK.

BALTIMORE, *March*, 1847.

INSTRUCTIONS

TO FIND THE NUMERAL LETTERS OR NUMBERS OF ANY VESSELS ENTERED IN THE MARINE ROLL.

Refer to the Index in the front part of this book for the District, in which your vessel has been enrolled or registered; where it may be found under the CLASS of vessels to which she belongs.

FOR EXAMPLE.—To find the NUMERAL LETTERS, or NUMBERS, representing the Name of the SHIP FRANKLIN OF NEW YORK CITY. First, turn to the District of New York City, which may be found in the Index, its folio number being 122; then turn to page 122, where the District commences, and among the List of Ships alphabetically arranged, will be found the following:

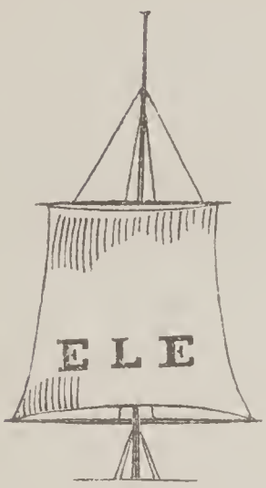
K E M 27.885 Ship Franklin.

Always be particular to notice under what District or heading, the vessel is entered. The following is the order of classification in each District.

1st. Steamers.	4th. Brigs.
2d. Ships.	5th. Schooners.
3d. Barks.	6th. Sloops.

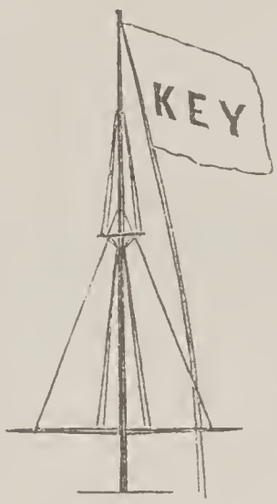
For a LIST OF PORTS AND INSPECTION STATIONS, see page 7.

Masters of vessels purchasing this book are requested to have the *letters* indicating their vessel's names painted on a piece of canvass, or on one of their sails, for the purpose of being displayed when at sea, or if they prefer a signal flag, it may be used as seen in the following Example.



See page 69.

E L E Ship James Perkins
Boston, Mass.



See page 125.

K E Y Ship Geo. Washington
New York City.

The Proprietors offer to furnish Owners and Masters of vessels with a copy of the "American Semaphoric Signal Book," with the *right* to make and use the Flags, or if preferred, will furnish the Book and Flags.
